PROFESSIONAL SUMMARY

Cloud & Linux Engineer with 3+ years of experience in cloud infrastructure management, Linux administration, and CI/CD implementation. Experienced in deploying and maintaining AWS-based infrastructure, automating operational tasks using Bash scripting, and maintaining production servers with high availability. Strong background in troubleshooting, server migrations, and supporting SLA-driven environments. Passionate about building reliable, secure, and scalable systems that empower teams and users alike.

TECHNICAL SKILLS

- **Cloud Infrastructure:** AWS (EC2, EBS, S3, VPC, IAM, Route 53, ELB, CloudWatch), high-availability architecture, backup/snapshot management.
- **Linux Administration:** Ubuntu Server, RHEL, CloudLinux, system hardening, performance tuning, package management (YUM/RPM), LVM storage management.
- **DevOps & Automation:** CI/CD with AWS & Jenkins, Bash scripting, Git version control, Infrastructure as Code (Practicing: Terraform & Ansible).
- **Web & Application Hosting:** Apache, Nginx, PHP, MySQL, WHM/cPanel, SSL (Let's Encrypt/Certbot), Magento hosting support.
- **Networking & Security:** TCP/IP, DNS, HTTP/HTTPS, SSH hardening, firewalls, load balancers.
- **Monitoring & Incidents:** AWS CloudWatch, New Relic, Datadog, SLA-driven incident resolution, Jira, Slack.

PROFESSIONAL EXPERIENCE

Futureblox Technologies Pvt Ltd | Analyst - Cloud & Linux *July 2022 – Present*

Project: Enterprise Cloud Infrastructure – Online Shopping Web App

Role: Cloud Analyst – Infrastructure Reliability, Automation & Security

- Managed AWS-based Linux production infrastructure supporting enterprise business applications and high-availability workloads.
- Utilized Infrastructure as Code (IaC) principles to standardize and automate infrastructure provisioning.
- Built and maintained CI/CD pipelines to automate application deployment and improve release reliability.
- Performed system hardening, patching, and security enforcement aligned with enterprise compliance standards.

- Implemented monitoring, alerting, and logging using CloudWatch and third-party tools to enhance system reliability.
- Automated infrastructure tasks and validation checks using Bash scripting to reduce manual intervention.
- Supported incident response, root cause analysis, and performance optimization for production environments.
- Collaborated with cross-functional teams to maintain system uptime, scalability, and operational stability.

Scsoft Technologies Private Ltd | Linux System Engineer *August 2021 – June 2022*

- Deployed and managed Linux-based cloud servers for client projects.
- Configured and maintained WHM/cPanel hosting environments on CloudLinux servers.
- Resolved server, hosting, and network-related support tickets efficiently.
- Configured and managed network and application protocols including DNS, HTTP, FTP, SSH, and TCP/IP.
- Performed package management using YUM/RPM and managed storage with fdisk and LVM.

EDUCATION

- Bachelor of Science in Electronics | Mahatma Gandhi University, Kerala (2015)
- Plus Two | Board of Higher Secondary Education, Kerala (2012)
- SSLC | Board of Public Examinations, Kerala (2010)
